

CLINICAL ANALYSIS REPORT

FEDERATED NEURAL NETWORK EVALUATION CONSULTANT: DR. AMAYA VK

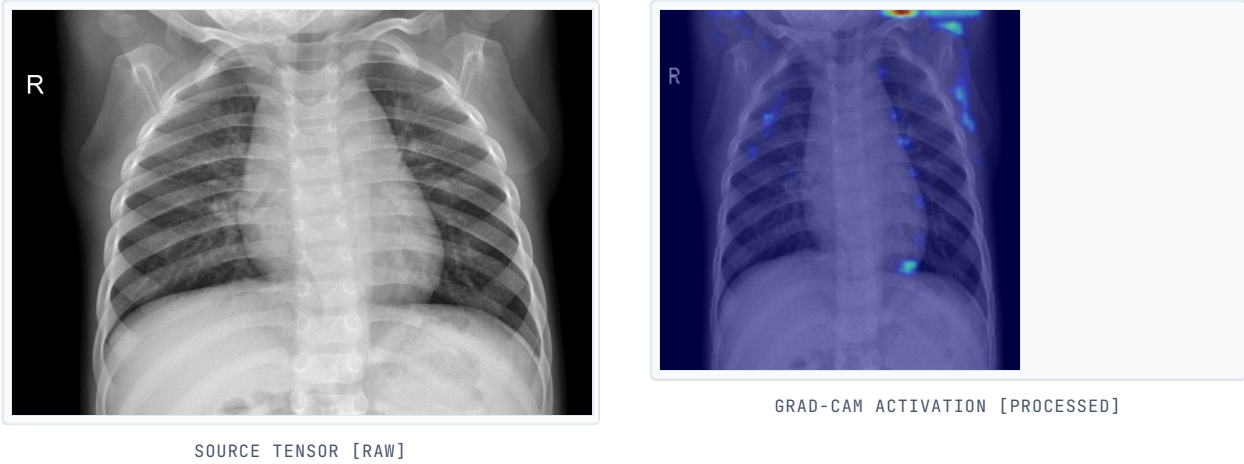

00 // SUBJECT DEMOGRAPHICS

PATIENT NAME Jhon Philip	AGE / GENDER 35 / Male	CONTACT 789087549
HEIGHT 180 cm	WEIGHT 68 kg	RECORD ID 3dddc6d2

01 // PRIMARY FINDINGS

SYSTEM CLASSIFICATION NORMAL	NEURAL ACTIVATION CONFIDENCE 99.69%
---	---

02 // RADIOLOGICAL TELEMETRY

* The Grad-CAM overlay maps the specific topographical features within the source tensor that disproportionately influenced the neural network's classification state.

! MEDICAL PROTOCOL OVERRIDE REQUIRED

This document contains output from an experimental autonomous neural network. The predictions contained herein are purely statistical correlations mapping image topologies to trained datasets. This tool provides ZERO clinical diagnostic capabilities. A certified radiologist or medical professional MUST review the original radiograph explicitly without relying on these findings.
